As the Chesapeake Bay Watershed begins to warm up with June sunshine, the region becomes filled with summertime wildlife, blooms, and activities. This issue highlights the cicadas' return, the blooming of persimmon flowers, and summer hikes. This month's Tree Talk features the American chestnut, a rare find in forests today.

What's Poppin? Phenological Fun!

Common persimmon, *Diospyros virginiana*, produces a tasty fruit and also has a beautiful, but sometimes hard to find, yellow flower. One of the host species for the luna moth, this small-sized tree supports native wildlife with its leaves and fruit and could also feed you, if you are patient!

Tree Talk: American Chestnut

We found something amazing in the woods this spring: a wild, reproducing American chestnut! American chestnut, *Castanea dentata*, is functionally extinct in the wild due to an introduced fungus that wiped out the species in the early 20th century. Watch this month's Tree Talk to hear more about this fascinating species.
